B.S. Chemistry

This degree track is designed for students interested in working in a chemical industry or governmental laboratories. In addition to the general degree requirements, the track requires satisfactory completion of courses in chemistry, mathematics, and physics. These electives permit flexibility for evolving and changing student interests. A broad range of upper-level elective courses exists to expose students to modern techniques within the chemical sciences, and to help students expand their college experience.

Complete course requirements for this track be found here: B.S. Chemistry
